

City of Oakley
ADDENDUM NO. 1 to contract documents for
CIP 208 – Laurel Road Widening (Mellowood Drive to Main Street)

BID OPENING DATE: May 21, 2020 2:00 PM

Notice is hereby given that the following clarifications and revisions are made to the above referenced contract documents:

Updates to the Specifications:

Part I, Page 1

BID OPENING DATE HAS CHANGED TO MAY 21, 2020

Due to the COVID-19 outbreak and current shelter in place orders the Project construction start date shall be in June or later dependent upon the current order under which the City of Oakley is regulated regarding commercial construction.

Part I, Page 21

1.09 **TIME OF COMPLETION.**

The entire work shall be brought to completion in the manner provided for in the Contract Documents on or before the **NINETY (90)** working day, (hereinafter called the "Completion Date") from and after the receipt by Contractor of the Notice to Proceed unless extensions of time are granted in accordance with the Contract Documents.

Part III, Appendix A

Soils Report

Updates to the Project Plans:

Several pages of the plans were not legible. The updated plan sheet pages 3, 10-17, 25-31, 37, and 38 are included with this addendum. In addition, new Cover Sheet (T-1), and cross section sheets 33a (SEC-1) and 33b (SEC-2) have been included

All bidders shall acknowledge receipt and acceptance of Addendum No. 1 by signing in the space provided at the end of this Addendum and submitting the signed addendum with their proposal.

Jason Kabalin
Capital Projects Coordinator

Company Name

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the City Clerk of the City of Oakley, 3231 Main Street, Oakley, CA 94561, until

2:00PM

Thursday

May 21, 2020

for the following project:

CIP 208 – LAUREL ROAD WIDENING FROM MELLOWOOD DRIVE TO MAIN STREET

at which time they will be publicly opened and read aloud. Sealed proposals must be clearly marked on the outside with the Project number, date, and time of bid.

Contractor questions must be received by Tuesday, May 14th at 5:00pm.

Due to the COVID-19 outbreak and current shelter in place orders the Project construction start date shall be in June or later dependent upon the current order under which the City of Oakley is regulated regarding commercial construction.

This following information is presented to indicate the size of the project and no warrant is made or intended as to final quantities:

Project Description

The work to be performed under this contract generally consists of, but is not limited to the following:

Mobilization and demobilization; traffic control and construction signage; removal and replacement of traffic striping, marking, and markers; removal of curbs and gutters, removal of sidewalks, clearing and grubbing, roadway excavation, common excavation removal of pavement and base material, removal of subbases, native material fill, construction of new concrete curb and gutter, sidewalk, median islands, curb ramps, rubberized hot mix asphalt (RHMA), hot-mix asphalt (HMA) pavement and base; storm drain improvements; utility rearrangements, traffic signal, street lighting, signing and striping, planting and irrigation, bioretention areas, and other work as shown on the Contract Plans, as specified in the Contract Documents, and as directed by the City Engineer.

Each bid must be accompanied by a cashier's check, certified check, or Bidder's Bond executed by a responsible corporate surety authorized to issue such bonds in the State of California and secured through an authorized agent with an office in California, payable to the City of Oakley, in an amount not less than ten percent (10%) of the amount of the Base Bid. The successful bidder will be required to furnish a Performance Bond in an amount equal to one-hundred percent (100%) of the contract price, and a Labor and Material Bond in an amount equal to one-hundred percent (100%) of the contract price. Said bonds shall also be executed by a corporate surety authorized to engage in such business in the State of California and be made payable to the City of Oakley.

If the successful bidder fails, neglects, or refuses for TEN (10) calendar days after the award of the contract to enter into the contract to perform the work, the cashier's check, certified check, or Bidder's Bond accompanying the bid and the amount therein named, shall be declared

manner designated in, and in strict conformity with the Contract Documents for the project entitled: **LAUREL ROAD WIDENING PROJECT**

1.05 CONTRACT AMOUNT AND PAYMENTS.

City agrees to pay, and Contractor agrees to accept, in full payment for the above work, the sum of _____ **DOLLARS AND _____ CENTS (\$_____)**, which sum is to be paid according to the schedule and in the manner set forth herein and subject to additions, deductions, and withholding as provided in the Contract Documents. When it is provided in the Notice to Bidders, Instructions to Bidders, or Proposal Form that Contractor is to be paid on the basis of the unit prices shown in his bid, instead of a lump sum price, the Contractor agrees to accept, in full payment for the above work, the sum computed in accordance with the actual amount of each item of work performed or material furnished, at the unit price which Contractor bid for each such item in his Proposal Form, said unit price to be determined as provided in the Standard Specifications and Special Provisions.

1.06 PROGRESS AND FINAL PAYMENTS.

Subject to the terms and conditions of the Contract Documents, City shall cause payments to be made upon demand of Contractor in the manner set forth in the Standard Specifications.

1.07 RETENTION OF SUMS CHARGED AGAINST CONTRACTOR.

When, under the provisions of this Contract, City shall charge any sum of money against Contractor, City shall deduct and retain the amount of such charge from the amount of the next succeeding progress estimate, or from any other moneys due or that may become due Contractor from City. If, on completion or termination of the Contract, sums due Contractor are insufficient to pay City's charges against him, City shall have the right to recover the balance from Contractor or its sureties.

1.08 COMMENCEMENT AND PROSECUTION OF WORK.

The Contractor shall begin work within TEN (10) working days of the date of the Notice to Proceed and shall diligently prosecute the same to completion before the expiration of **NINETY (90) WORKING DAYS**, after the date of Notice to Proceed. The phrase "commence the work" means to engage in a continuous program on-site including, but not limited to, site clearance, grading, dredging, land filling and the fabrication, erection, or installation of the work. Said Notice to Proceed shall be issued following execution of the Agreement and the filing by Contractor of the required bonds and proof of insurance. The continuous prosecution of work by Contractor shall be subject only to Excusable Delays as defined in this Agreement.

1.09 TIME OF COMPLETION.

The entire work shall be brought to completion in the manner provided for in the Contract Documents on or before the **NINETY (90)** working day, (hereinafter called the "Completion Date") from and after the receipt by Contractor of the Notice to Proceed unless extensions of time are granted in accordance with the Contract Documents.

1.10 PAYMENTS DO NOT IMPLY ACCEPTANCE OF WORK.

Oakley, CA 94561

Attn: Bolivar Valle

RE: CIP 208 Laurel Road, Oakley

Note: See page 5 for soil sample locations.

Background

Three samples were processed on December 13, 2019 identified as site soil from areas where new landscaping is scheduled for installation and existing landscaping requires maintenance recommendations. Organic fertilizer and amendment recommendations were requested. The samples were analyzed for horticultural suitability, fertility, and physical characteristics. The results of the analyses are attached.

Analytical Results and Comments

The reaction of the samples is slightly acidic in all three samples at a pH of 6.2 in the North sample, 6.7 in the Median sample and 6.5 in the South sample. These are all within the preferred range for most plants. Salinity (ECe), sodium and boron are safely low in all three samples. The sodium adsorption ratio (SAR) shows sodium is adequately balanced by soluble three and magnesium in all three samples; this balance is important for soil structure quality, which relates to the rate at which water infiltrates the soil.

According to the USDA Soil Classification, the less than 2mm fraction of the samples is classified as sand in the North and South samples and loamy sand in the Median sample. Organic content is low or moderately low in all three samples. Based on this information the estimated infiltration rate is 0.69 inch per hour in the North and South samples and 0.46 inch per hour in the Median sample. Infiltration rates may vary due to differences in compaction across the site.

In terms of fertility, nitrogen is low in all three samples while phosphorus is low in the North and Median samples and sulfate is low in the North and South samples. All of the other major nutrients are sufficient for proper plant nutrition in at this time in all three samples. Of the micronutrients; copper, iron and zinc are sufficient in all three samples while iron is fair in the North sample and low in the Median sample.

Recommendations

Incorporation of nitrogen, phosphorus and sulfate fertilizers is recommended at the time of planting. Incorporation of a composted greenwaste product is also recommended in order to help improve soil nutrient holding capacity and porosity. A composted greenwaste amendment should help provide supplemental phosphorus, potassium and micronutrients, product depending.

The primary symptom of manganese deficiencies is a general yellowing of leaves with veins remaining green. In severe cases, leaves may become pale yellow or whitish, but veins remain green. Brown spots may develop between veins and leaf margins may turn brown. Manganese deficiency symptoms appear first on younger leaves. If these symptoms are present after plant installation they may be treated with an application of a chelated micronutrient product at the manufacturer's recommended rate.

Anaheim Office
Report 19-347-0010

Incorporation of a composted greenwaste amendment would also provide additional micronutrients and may be sufficient to negate any deficiency, product depending.

Boron is safely low for general ornamental plants and may be below optimum levels for plant nutritional purposes in the North and South samples. Irrigation water often supplies sufficient boron to meet plant nutritional requirements. However, if boron is low in the irrigation water and/or plants show symptoms of boron deficiency after they are well established, you may consider an application of a product containing boron at the manufacturer's label rate. Boron deficiency symptoms often include stunted or deformed younger growth and tight internodes. Tissue testing can be performed to identify a boron deficiency if it is suspected. Incorporation of a composted greenwaste amendment may be sufficient to negate this deficiency, product depending.

Top Dress for Existing Plantings:

The following materials should be evenly broadcast and thoroughly irrigated in:

	<u>Amount per 1000 Square Feet</u>
5 pounds	Blood Meal (12-0-0) All Sample Areas
10 pounds	Feather Meal (12-0-0) All Sample Areas
6 pounds	Steamed Bone Meal (3-15-0)* North and Median Areas
8 pounds	Gypsum (Calcium Sulfate) North and South Areas

To Prepare For Mass Planting:

Drainage of the root zone should be improved by first loosening the top 10 inches of any undisturbed or compacted soil. The following materials should then be evenly spread and thoroughly blended with the top 6 inches of soil to form a homogenous layer:

	<u>Amount per 1000 Square Feet</u>
5 cubic yards	Composted Greenwaste Organic Amendment* North and South Areas
3 cubic yards	Composted Greenwaste Organic Amendment* Median Area
6 pounds	Blood Meal (12-0-0) All Sample Areas
14 pounds	Feather Meal (12-0-0) All Sample Areas
8 pounds	Steamed Bone Meal (3-15-0)* North and Median Areas
10 pounds	Gypsum (Calcium Sulfate) North and South Areas

*The rate may change based on the analysis of the chosen organic amendment. This rate is based on 270 pounds of dry weight of organic matter per cubic yard of amendment. If a composted greenwaste amendment is chosen that contains a significant amount of phosphorus, the steamed bone meal should be decreased or omitted accordingly.

To Prepare Backfill For Trees and Shrubs:

- Excavate planting pits at least twice as wide as the diameter of the root ball.
- Soil immediately below the root ball should be left undisturbed to provide support but the sides and the bottom around the side should be cultivated to improve porosity.
- The top of the root ball should be at or slightly above final grade.
- The top 12 inches of backfill around the sides of the root ball of trees and shrubs may consist of the above amended soil or may be prepared as follows:

Anaheim Office
Report 19-347-0010

3 parts Site Soil **North and South Areas**
1 part Composted Greenwaste Organic Amendment*

Uniformly blended with:

5 parts Site Soil **Median Area**
1 part Composted Greenwaste Organic Amendment*

Uniformly blended with:

<u>Amount per Cubic Yard of Backfill</u>	
1/3 pound	Blood Meal (12-0-0) All Sample Areas
3/4 pound	Feather Meal (12-0-0) All Sample Areas
1/2 pound	Steamed Bone Meal (3-15-0)* North and Median Areas
1/2 pound	Gypsum (Calcium Sulfate) North and South Areas

- Backfill below 12 inches required for 24 inch box or larger material should not contain the organic amendment, blood meal or feather meal but should still contain the steamed bone meal and gypsum at the recommended rates.
- Ideally a weed and turf free zone should be maintained just beyond the diameter of the planting hole. A 2-4 inch deep layer of coarse mulch can be placed around the tree or shrub. Mulch should be kept a minimum 4 inches from the trunk.
- Irrigation of new plantings should take into consideration the differing texture of the rootball substrate and surrounding soil matrix to maintain adequate moisture during this critical period of establishment.

Maintenance

Maintenance fertilization should rely primarily on a nitrogen only program supplemented with a complete fertilizer in the fall and spring. Blood Meal (12-0-0) provides available nitrogen fairly rapidly while materials such as Feather Meal (12-0-0), Soybean or Cotton Seed Meal (7-1-1) are slower to provide available nitrogen, but they extend the length of time they make this contribution. In order to provide a good supply of nitrogen for a 3-4 month time frame a good combination would be 6 pounds Blood Meal and 14 pounds Feather Meal per 1000 square feet. In the fall and spring, substitute a complete organic fertilizer such as 5-5-5 applied at the manufacturer's label rate. Or, nutrient rich composted greenwaste may be spread in a 1 to 2 inch layer, which generally carries enough nutrition to boost complete nutrition though a source of nitrogen might also be added at a half rate to assure adequate nitrogen availability.

If we can be of any further assistance, please feel free to contact us.

NOTES:

- THIS PLAN IS ACCURATE FOR DEMOLITION WORK ONLY.
- FOR GEOMETRY OF CONTROL LINE, SEE PROJECT CONTROL DRAWING.
- SAWCUT EXISTING PAVEMENT AND/OR PAVEMENT EDGE TO A NEAT LINE, PROTECT VERTICAL EDGE.
- CONTRACTOR IS SOLELY RESPONSIBLE FOR THEIR OWN EARTHWORK QUANTITY CALCULATIONS.
- NO COMPACTION OR EXPANSION FACTORS HAVE BEEN APPLIED.
- REMOVE MEDIAN, SIDEWALK AND GUTTER TO NEAREST SCOREMARK JOINT.
- THE LINES AND THICKNESS SHOWN FOR THE REMOVAL OF PAVEMENT, CURB AND GUTTER, SIDEWALK AND ALL OTHER CIVIL CONSTRUCTION WORK ARE FOR INFORMATION ONLY. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO DETERMINE THE EXTENT OF WORK BASED ON THE SPACE REQUIRED TO PERFORM THE CONSTRUCTION WORK AND/OR THE CONTRACTOR'S MEANS AND METHODS AND REQUIREMENTS FOR SHORING, EXCAVATION AND TEMPORARY SUPPORT.
- CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ANY BENCHMARK OR MONUMENTATION UNLESS OTHERWISE NOTED ON PLANS. IF A BENCHMARK OR MONUMENTATION IS DISTURBED, THE CONTRACTOR SHALL HAVE A LICENSED LAND SURVEYOR RESTORE THE BENCHMARK OR MONUMENTATION AT THE CONTRACTOR'S EXPENSE.
- PAVEMENT, AGGREGATE BASE AND SUBGRADE MATERIAL SHALL BE REMOVED TO THE LINES AND GRADES SHOWN ON THESE PLANS.
- FOR CUT AND FILL INFORMATION, SEE GRADING PLANS.
- FOR RELOCATION OF UTILITIES IN CONFLICT WITH THE WORK, SEE UTILITY PLANS.
- NOT USED.
- CONTRACTOR SHALL CLEAR AND GRUB AREA PRIOR TO EXCAVATING NATIVE MATERIAL.
- IN AREAS TO RECEIVE OVERLAY, UTILITIES SHALL BE LOWERED FOR GRADING OPERATIONS AND RAISED TO FINAL GRADE.
- THESE AREAS HAVE SIERRACRETE AS A ROADWAY BASE MATERIAL. SIERRACRETE SHALL BE COMPLETELY REMOVED FROM THE ROADBED. SEE UTILITY PLANS FOR EXISTING PAVEMENT THICKNESS. CONTRACTOR SHALL NOTIFY CITY ENGINEER IF SIERRACRETE IS FOUND OUTSIDE THE LIMIT SHOWN ON THESE PLANS. CONTRACTOR SHALL REMOVE SIERRACRETE BELOW (E) C&G TO REMAIN, SEE DETAIL **(6)** CD-3
- REMOVE IRRIGATION FACILITIES IN CONFLICT WITH THE WORK. SEE IRRIGATION PLANS FOR MORE INFORMATION.
- FOR LIGHTING AND TRAFFIC SIGNAL WORK, SEE ELECTRICAL AND TRAFFIC SIGNAL PLANS.
- FOR SIGN REMOVAL, RELOCATION AND SALVAGE, SEE SIGNING AND STRIPING PLAN.
- CONTRACTOR SHALL REMOVE TREES AND TREE STUMPS TO A DEPTH OF 3' BELOW GROUND AND (E) IRRIGATION INFRASTRUCTURE AS PART OF CLEAR AND GRUB WORK.
- CONTRACTOR SHALL INSTALL 4' ORANGE CONSTRUCTION FENCE PRIOR TO ANY WORK. 4' ORANGE CONSTRUCTION FENCE SHALL BE MAINTAINED AND KEPT UPRIGHT FOR THE DURATION OF THE PROJECT.
- CONFIRM LIMITS OF BASE REPAIR WITH CITY ENGINEER PRIOR TO BEGINNING WORK. BASE REPAIRS SHALL BE COMPLETED PRIOR TO ANY GRINDING AND OVERLAY OPERATIONS.
- FOR TREE PROTECTION DETAILS, SEE PLANTING PLANS, SEE DETAIL **(7)** LA-5

Date: 01/15/2020	No.	Revisions
Scale: AS NOTED	A	DRAFT SUBMITTAL 01/15/20
Design: CC	B	FINAL SUBMITTAL 03/04/20
Drawn: AH		
Approved: MC		
Job No: 20176057-10		

NOTES:

- THIS PLAN IS ACCURATE FOR DEMOLITION WORK ONLY.
- FOR GEOMETRY OF CONTROL LINE, SEE PROJECT CONTROL DRAWING.
- SAWCUT EXISTING PAVEMENT AND/OR PAVEMENT EDGE TO A NEAT LINE, PROTECT VERTICAL EDGE.
- CONTRACTOR IS SOLELY RESPONSIBLE FOR THEIR OWN EARTHWORK QUANTITY CALCULATIONS.
- NO COMPACTION OR EXPANSION FACTORS HAVE BEEN APPLIED.
- REMOVE MEDIAN, SIDEWALK AND GUTTER TO NEAREST SCOREMARK JOINT.
- THE LINES AND THICKNESS SHOWN FOR THE REMOVAL OF PAVEMENT, CURB AND GUTTER, SIDEWALK AND ALL OTHER CIVIL CONSTRUCTION WORK ARE FOR INFORMATION ONLY. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO DETERMINE THE EXTENT OF WORK BASED ON THE SPACE REQUIRED TO PERFORM THE CONSTRUCTION WORK AND/OR THE CONTRACTOR'S MEANS AND METHODS AND REQUIREMENTS FOR SHORING, EXCAVATION AND TEMPORARY SUPPORT.
- CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ANY BENCHMARK OR MONUMENTATION UNLESS OTHERWISE NOTED ON PLANS. IF A BENCHMARK OR MONUMENTATION IS DISTURBED, THE CONTRACTOR SHALL HAVE A LICENSED LAND SURVEYOR RESTORE THE BENCHMARK OR MONUMENTATION AT THE CONTRACTOR'S EXPENSE.
- PAVEMENT, AGGREGATE BASE AND SUBGRADE MATERIAL SHALL BE REMOVED TO THE LINES AND GRADES SHOWN ON THESE PLANS.
- FOR CUT AND FILL INFORMATION, SEE GRADING PLANS.
- FOR RELOCATION OF UTILITIES IN CONFLICT WITH THE WORK, SEE UTILITY PLANS.
- NOT USED.
- CONTRACTOR SHALL CLEAR AND GRUB AREA PRIOR TO EXCAVATING NATIVE MATERIAL.
- IN AREAS TO RECEIVE OVERLAY, UTILITIES SHALL BE LOWERED FOR GRADING OPERATIONS AND RAISED TO FINAL GRADE.
- THESE AREAS HAVE SIERRACRETE AS A ROADWAY BASE MATERIAL. SIERRACRETE SHALL BE COMPLETELY REMOVED FROM THE ROADBED. SEE UTILITY PLANS FOR EXISTING PAVEMENT THICKNESS. CONTRACTOR SHALL NOTIFY CITY ENGINEER IF SIERRACRETE IS FOUND OUTSIDE THE LIMIT SHOWN ON THESE PLANS. CONTRACTOR SHALL REMOVE SIERRACRETE BELOW (E) C&G TO REMAIN, SEE DETAIL **(6)** CD-3
- REMOVE IRRIGATION FACILITIES IN CONFLICT WITH THE WORK. SEE IRRIGATION PLANS FOR MORE INFORMATION.
- FOR LIGHTING AND TRAFFIC SIGNAL WORK, SEE ELECTRICAL AND TRAFFIC SIGNAL PLANS.
- FOR SIGN REMOVAL, RELOCATION AND SALVAGE, SEE SIGNING AND STRIPING PLAN.
- CONTRACTOR SHALL REMOVE TREES AND TREE STUMPS TO A DEPTH OF 3' BELOW GROUND AND (E) IRRIGATION INFRASTRUCTURE AS PART OF CLEAR AND GRUB WORK.
- CONTRACTOR SHALL INSTALL 4' ORANGE CONSTRUCTION FENCE PRIOR TO ANY WORK. 4' ORANGE CONSTRUCTION FENCE SHALL BE MAINTAINED AND KEPT UPRIGHT FOR THE DURATION OF THE PROJECT.
- CONFIRM LIMITS OF BASE REPAIR WITH CITY ENGINEER PRIOR TO BEGINNING WORK. BASE REPAIRS SHALL BE COMPLETED PRIOR TO ANY GRINDING AND OVERLAY OPERATIONS.
- FOR TREE PROTECTION DETAILS, SEE PLANTING PLANS, SEE DETAIL **(7)** LA-5

PLAN
SCALE: 1"=20'

MATCH LINE
SEE DRAWING NO. GD-2

NOTES:

- FOR GENERAL NOTES, SEE GN-1. FOR ABBREVIATIONS, SEE DRAWING T-1.
- FOR GEOMETRY OF CONTROL, SEE PC-1.
- THIS PLAN IS ACCURATE FOR GRADING AND DRAINAGE FACILITIES ONLY.
- CURB AND GUTTER ELEVATIONS ARE SHOWN AT 50' INTERVALS ALONG "L" LINE, UNLESS NOTES OTHERWISE.
- ALL EXISTING ABOVE GROUND UTILITY FEATURES SHALL BE ADJUSTED TO GRADE UNLESS OTHERWISE NOTED.
- TRENCHING SHALL CONFORM TO CITY OF OAKLEY STORM DRAIN TRENCH DETAILS CD01, SEE DETAIL **(1)** CD-2
- STATION AND OFFSET FOR STORM DRAIN INLETS SHALL BE PER DETAIL **(4)** CD-3
- CONTRACTOR SHALL VERIFY EXISTING GRADE PRIOR TO GRIND AND OVERLAY OPERATIONS.
- CONTRACTOR SHALL DEPRESS THE GRADE INTO A CONCAVE CROSS-SECTION (1" MIN) AND PLANT NON-IRRIGATED HYDROSEED WITHIN THE SELF-RETAINING AREA LIMITS SHOWN ON THE PLANS.
- PLACE UNDERDRAIN TOWARDS SOUTH SIDE TO CLEAR PROPOSED LIGHT POLE FOUNDATION.
- FOR PROPOSED LIGHT LOCATIONS, SEE STREET LIGHTING PLAN

LEGEND:

- Exist STORM DRAIN LINE (SEE PLAN FOR SIZE)
